Couple 10: Cock

For those who love red **Janssen Arendonk** birds, **Vos Beauty** is certainly a delight. His mother and father were both reds: his father from the line of Vos van ’90 Volière; his mother from Oude Vos van ’81. Complement this with the lines of Goede Kapot Borstbeen and Jonge Merckx to name but a few and anyone with even a slight interest in Janssen Arendonk immediately knows he’s got top material in his hands. Vos Beauty was bred by ourselves out of two original Janssen birds, who trace their pedigrees back to 1926.

Couple 10: Hen

112/00 is an original **Janssen Arendonk** hen. Saying that she has an impressive pedigree is no exaggeration. All major lines of the Janssen family seem to come together in this beautiful hen: Stier, Jonge Merckx, Vos van ’90 Volière, 019, Geeloger, Oude Witoger, Eksteroog, Raket, Goede Jaarling, Ijskop, Scherpe, Rakkertje, Beul (112’s grandfather), Goede Kapot Borstbeen, Duivin 2 eerste prijzen, ... the list seems endless and leads us all the way back through Janssen Arendonk history to 1926. A superb example of the quality that Louis Janssen, the remaining Janssen brother, still produces on his loft today.
